About CSE

The Conference on Sustainability in Engineering (CSE) is an annual, student-led conference dedicated to empowering the next generation of engineers towards a greener future. CSE was created with the goal to bring together students and industry leaders from across Canada to discuss innovative ideas and reconsider how they can make a positive impact in sustainability.

In 2027, CSE will be held at McGill University's Downtown Campus, bringing together delegates for four days of panels, workshops, industry tours, and engagement.

CSE is a movement, inviting students to lead with purpose, drive impactful solutions, and pave the way towards a sustainable world.

Our Theme

Assembling our tools:
A greener approach to the future

This theme is about developing the skills and honing the tools to confidently and competently approach engineering sustainability on campus and in students' future careers.

What is the CFES?

The Canadian Federation of Engineering Students (CFES) is a bilingual student organization representing over 85,000 engineering students from 50 member school across Canada.

Our goal is to create opportunities for students to develop their leadership, communication, technical skills, and identity through conferences, workshops, technical skills, and and identity through conferences, workshops, competitions, and community building across regional barriers.

We host four annual engineering conferences, bringing students together to learn, share perspectives, and network, in addition to the Canadian Engineering Competition, which allows students to showcase their technical skills.

5th Year Civil Engineering Student

Dear Potential Sponsors,

McGill University is proud to host the Conference on Sustainability in Engineering (CSE) 2027 from February 25th - 28th, 2027 in Montreal, Quebec, bringing together over 150 passionate students from across Canada to discuss and collaborate on sustainability in engineering. With your support, we hope to highlight work from across Canada, and help students focus on the technical side of sustainability. Through this conference, students can use this information to inform decisions within their campus and programs to help build a more sustainable future.

Our theme for CSE is “Assembling our tools: A greener approach to the future”, with our goal being to ensure students can find new, innovative solutions to modern-day sustainability problems that face our changing climate. We want to create a collaborative and informative atmosphere at CSE where students can work together to learn, solve, and implement what is taught at our multi-day conference. This will be done through a variety of sessions throughout the conference, from panels given by current engineers working in sustainability, to case competitions where students must find a unique solution to a problem given to their respective team. By challenging our delegates to think outside the box and work together to find solutions, we are sure CSE 2027 will help foster a mindset for students to implement change in their future professions.

This conference offers your organization the opportunity to connect with future engineering leaders, learn from expert speakers, network with delegates in professional and casual settings, and showcase the sustainable work you are doing to pave the way for our future engineers. Sponsors are given the opportunity to enjoy the sessions provided by the conference while also providing an opportunity for your organization to find like-minded individuals who are passionate about sustainability.

We ask for your help as CSE is only possible through sponsor support. We hope to partner with your organization and cultivate an engineering community that is passionate about sustainability and building a greener future, capable of creating real change both in and out of university. On behalf of the whole organizing committee of CSE 2027, we thank you for considering this sponsorship opportunity, and hope to hear from you soon.

Sincerely,

Brigit Crumley and Dana Schmid,
Co-Chairs, Conference on Sustainability in Engineering 2027
McGill University

A Letter from the Dean of Engineering

Viviane Yargeau

McGill

Faculty of Engineering | Faculté de génie

Viviane Yargeau
Dean, Faculty of Engineering
Doyenne, Faculté de génie

1 April 2025

To the Canadian Federation of Engineering Students,

I am delighted to express my strong support for the Engineering Undergraduate Society (EUS) of McGill University to host the Conference on Sustainability in Engineering (CSE) in 2027. The Faculty of Engineering would provide logistical support to ensure the success of the conference.

Sustainability is one of our Faculty's core research areas, is central to our teaching and training values, and is a theme I am personally passionate about, having dedicated my research career to the area of protecting water resources. The Faculty of Engineering is home to the Trottier Institute for Sustainability in Engineering and Design (TISED), a research, teaching and outreach node whose mission is to produce innovative engineering and design solutions and intellectual capacity that enables us to protect and nurture Earth and its inhabitants to meet the needs of current and future generations.

The Faculty is also actively engaged in the Canadian Engineering Grand Challenges (CEGC) Champions Program. The CEGC Champions Program aims to empower students to become catalysts for positive change. Developed by Engineering Deans Canada, the program the offers students the unique opportunity to demonstrate how they are tackling six critical challenges faced by Canadians. One of our core teaching missions is to educate students about the challenges in sustainability in engineering and design and encourage students to develop innovative solutions to overcome them.

EUS has been at the forefront of numerous sustainability-focused initiatives spearheaded by the Sustainability in Engineering at McGill (SEAM) student community. Given the priority on sustainability within EUS and McGill as a whole, I believe the conference will significantly benefit our students by strengthening our community and providing more opportunities and tools to engage in topics such as renewable energy, sustainable construction, water resources, and sustainable manufacturing. Additionally, it would bolster collaboration between students and faculty, helping to develop new channels, collaborations, and ideas.

On behalf of the Faculty of Engineering, I wholeheartedly endorse the EUS bid to host the 2027 CFES Conference on Sustainability. I am confident that this conference will be a significant milestone in advancing sustainability within our community.

Sincerely,

Viviane Yargeau, ing., PhD

Sponsorship Tiers

	Tier 1 Diamond Partner	Tier 2 Platinum	Tier 3 Gold	Tier 4 Silver	Tier 5 Bronze
Amount	$20,000+	$15,000+	$10,000+	$5,000+	$1,000+
Quantity	1	2	3	∞	∞
Website	Banner, XL Logo	XL Logo	L Logo	M Logo	S Logo
Social Media	Dedicated post + mentioned in all other posts	Dedicated post + 2 story mentions	Carousel post + 1 story mention	One combined carousel post	One story mention
Logo size on delegate package	Dedicated page + dedicated ad page	Dedicated page	Half page	Quarter page	Combined page
LinkedIn	Individual post	Combined post for both Tier 2	One-third of combined Tier 3 post	Combined post	Combined mention
Career Fair booth	2 tables + first pick of location	2 tables	1 table	1 table	

	Diamond	Platinum	Gold	Silver	Bronze
Delegate bag item	Yes	Yes	Yes	Brochure	
Opportunity to sponsor technical session	Yes	Yes	Yes		
Meal sponsored	Gala dinner	Lunch	Breakfast		
Number of gala tickets	4	2	1		
Speech opportunity	Choice of opening ceremony, gala, or both	Opening ceremony			
Private interview rooms during career fair	Yes (optional)	Yes (optional)			
Company logo on name tag	Yes				

Budget Allocations

Safety, belonging, and meaningful programming are of utmost priority for the CSE 2027 team. With a targeted budget of $117,500, we hope to provide a transformative experience for all delegates, speakers, sponsors, and attendees.

More details regarding the CSE 2027 budget can be provided upon request.

Sponsorship Considerations

We are excited about the opportunity to collaborate and are committed to building mutually beneficial partnerships. We remain flexible and are open to discussing tailored arrangements, including virtual participation, industry exclusivity, in-kind contributions, and more.

We also offer a Hometown Hero sponsorship package designed to support and highlight small local businesses; please contact us for further details.

As a conference centred on sustainability, we prioritize parnerships with organizations that share and actively support sustainability-focused values.

To ensure we can effectively maximize the impact of your support, we kindly request that all sponsorship agreements be finalized by January 15th, 2027, unless otherwise agreed upon in advance.

Commitment to Bilingualism

The CSE 2027 team is committed to providing a fully bilingual conference experience, ensuring all attendees are able to participate in every part of the conference.

Throughout the conference, all sessions will be available in both official language thanks to the use of live translation provided by an external company. Additionally, all conference materials & speeches will be offered bilingually.

While not required, we highly value partners who are able to provide bilingual engagement or materials to enhance accessibility for all attendees.
